

In the Specification:

Please enter the substitute specification attached hereto. A marked-up copy of the specification, showing the changes made thereto, is also attached.

In the Claims:

Please cancel claims 5 and 6 without prejudice or disclaimer.

Please amend claims 1-4 to read as follows. A marked-up copy of claims 1-4, showing the changes made thereto, is attached.

Q,
sub
B1

1. (Amended) A conductive liquid crystal device comprising:
a pair of oppositely disposed electrodes, and
at least two organic layers including a liquid crystalline organic layer and an organic luminescence layer disposed between the electrodes,
wherein the liquid crystalline organic layer has plural regions having different electroconductivities, and
wherein the organic luminescence layer emits luminescences by receiving charges supplied by the plural regions of the liquid crystalline organic layer having different electroconductivities.

2. (Amended) The device according to Claim 1, wherein said plural regions have different alignment states of liquid crystal molecules.
